West Lake Landfill Interim Data Summary Report - VOCs and H2S by Diffusive Samplers.pdf

James,

The attached report summarizes VOC and H2S data obtained via passive/diffusive samplers (Radiello cartridges). Radiello cartridges have been deployed on weekly rotations starting in December 2014. This report summarizes data from December 2014 through March 2015. Data obtained after March 2015 will be summarized in a subsequent report.

The VOC plots in this report show data obtained via Radiello cartridges as well as Summa canisters (which was the VOC sampling method employed May – December 2014). This allows a visual/qualitative comparison of VOC data obtained via the two different methods.

Thanks,

Rob
